Description

A weathered astronaut standing alone on a windswept ridge of rust-colored regolith. His suit is a matte off-white shell scuffed with fine gray dust along the forearms and knees, with burnt-orange accent panels at the shoulders and a frayed mission patch stitched over the left chest. Corrugated fabric joints ring the elbows and hips, and a bundle of braided cables loops from a chunky life-support pack behind his shoulders down to a control box on his belt.
